

Eggersmann BLUE SELECT 15.44

Mobile Trommel Screen Machine

Recycling Technology

impaktor@f-e.de | f-e.de

With its **compact** trommel from the standard **4 metre class**, the BLUE SELECT 15.44 is an **affordable entry-level solution** for mobile screening of a wide variety of materials.

Versions

Flexible Change of Substructure

It is possible to **switch** between **trailer, crawler chassis** and **hooklift** at any time. The machine does not even need to be taken to a workshop.

Product Highlights

- › Compact transport dimensions
- › Adjustable trommel speed
- › Quick trommel change
- › Powerful drive concept

Materials

- | | |
|--------------------------|---------------------------|
| › Shred. Waste Wood | › Compost |
| › Shred. Green Waste | › Shred. Commercial Waste |
| › Shred. Household Waste | › Shred. C&D Waste |
| › Soil | › Shred. Glass |
| | › Shred. Plastic |

Features

Large Maintenance Doors

- › Free access to all maintenance components

Operating Unit

- › Self-explanatory operating unit with colour HMI display

Broom

- › Hydraulically swivelling brush for cleaning build-up from the trommel

230 V Connection

- › 230 V connection for additional devices
 - Air compressors, lighting columns, etc.

Troughed Conveyor Belts

- › Troughed conveyor belts for improved material discharge

Hydraulic Belts

- › Hydraulically folding and unfolding discharge belts

Emergency Switches

- › Three safety switches for maximum safety

Alarm Siren

- › Audible alarm signal when the machine starts working

Signal Light

- › Warning light as a danger indicator when the machine starts working

Options

Wire Mesh Trommel

Are you looking for a trommel for flexible applications? Then trommels with fine wire mesh are your best choice.

Lasered Steel Trommels

Do you want to screen difficult applications such as pre-shredded building rubble? Then you need solid, laser-cut steel trommels.

Stone Grid

- › Hydraulically tiltable stone grid to protect against heavy impurities

Hopper Extension

- › Hopper extension for an even easier material infeed

Lighting

- › Two LED lights for good visibility when working in the dark

Telescopic Legs

- › Four telescopic legs (hook lift version only)

Extra Long Conveyor Belts

- › Extra long fine grain belts for particularly high dumping cones
- › Can be folded three times

Remote Control

- › Wireless remote control for uncomplicated operation from a distance
 - (left: control of the tracks / right: operation of the screen function)

400 V Connection

- › 400 V connection for attachments on the discharge belts
 - Magnetic separator, air separator, etc.
